

Hasnaa Ahmed - Power BI Developer

PROJECT EXPERIENCE

E-Commerce Data Analytics & Predictive Insights Project

Role: Power BI Developer - Customer Segmentation

Duration: May 2025

Context: Final project for a Cloud & ML Bootcamp, presented in a national-level student competition.

Repository: <https://github.com/EslamAshraf32/E-Commerce-Data-Analytics-Predictive-Insights/tree/main>

Key Contributions:

- Led the customer segmentation analysis using Power BI to uncover distinct customer groups based on behavioral patterns.
- Utilized DAX and Power Query to clean, transform, and model e-commerce data.
- Designed interactive dashboards showcasing key segmentation insights to support business decision-making.
- Collaborated with the analytics and ML teams to align predictive insights with visual reporting.
- Contributed to the project presentation and explanation of business value during the final competition.
